

# ITAL® 50

**Type of fibre:** Pure polyester  
**Finishing:** Smooth  
**Construction:** Twisted multifilaments.  
**Use:** Mattresses (upper quilt)  
**Plastic cone:** Black ▲

## Description:

Ital® is a polyester multifilament thread ideal for quilting operations in high-speed multi-needle quilting machines. The thread's special construction allows an excellent sewability and seam strength, thus offering superior performance during use.

## Packaging:

Its 1kg vicone bobbin package allows reducing machine idle time for changing the cone, which increases production significantly.

Ticket	Strength (grammes)	Strength (pounds)	Stretching	Packaging
50	3071	6.76	16%	1kg / vicone

## Advantages:

- Knotless construction reduces sewing interruptions.
- Fine finish with high quality computer-applied softener, which provides a uniform lubrication, thus reducing machine adjustments.
- Seam excellent look.
- Precision winding avoids internal problems in the cone.
- Use in high-speed sewing machines.
- 1kg vicone bobbin package reduces machine idle time, thus increasing efficiency and production.
- Packaging specially designed for avoiding thread loss due to plastic cone breakage and allowing transportation without problem in a hold.
- Black plastic cone to identify Ital 50 in the event of losing the internal label.
- The colour avoids mixing materials, use in incorrect applications and organizes stock.
